The majority of these are add-ons (i.e., extensions), but there are also some applications that can be directly run from within AutoCAD. There are a number of factors that influence how a certain application appears in the store. For example, a free application that does not require a license may be listed for download in the store. The time of release is also an important factor, as most of the add-ons are offered as freeware, while the full versions are generally listed at the Autodesk Exchange site.
