SOS Online Backup For Business

SOS Online Backup for Business is a robust backup solution that can give managers a helping hand in this matter, creating encrypted vaults in the cloud to store documents, multimedia files, and other mission-critical data. The backup requires a dedicated account, so you are prompted to login or create one upon launch. Aside from regular accounts, you can opt for Standard UltraSafe or UltraSafe MAX ones, depending on the desired encryption level. The more sensitive the data, the higher the protection should be. SOS Online Backup for Business can backup documents, images, music and video files, as well as user-defined formats, providing advanced filtering options. Thus, you can exclude specific folders from the analysis, limit the minimum and maximum file size, or ignore files of a specific type. Backup scheduling and network deployment Once the filtering settings are configured, SOS Online Backup for Business proceeds to analyze your system. It can be instructed to scan certain folders, but you can also manually select the files to backup. The scan engine automatically selects compatible formats while also displaying a complete list of files and enabling you to include additional files to the backup. Thanks to the integrated scheduler, you can instruct SOS Online Backup for Business to run new tasks automatically, without user intervention, optionally sending backup reports via email. SOS Online Backup for Business can also perform network backups, enabling you to create a custom retention policy, telling the server for how long to keep storing the files. Data restoring is also possible, following the steps of the built-in wizards to retrieve files. Keep your files secure and available at all times With intuitive options and advanced backup capabilities, SOS Online Backup for Business is a good alternative for managers who want to make sure their most important files are secure and always available for restoring. Aside from local and cloud backups, it can also deploy backups across a network. Focusing mostly on security, this application uses military-grade encryption to protect your files. Features: Backup all your files Create encrypted vaults in the cloud Powerful file types filter Backup scheduling and network deployment Powerful encryption with military grade encryption Search files by filename or contents Data restoring is possible via built-in wizards Detailed log reports for service use Technical requirements: Mac OS X 10.7.x or later (10.6.0 will not work) Software and operating systems: SOS Online Backup for Business requires Mac OS X 10.7.x or later (10.

What's New in the SOS Online Backup For Business?

SOS Online Backup for Business is a robust online backup software solution that can give managers a helping hand in this matter, creating encrypted vaults in the cloud to store documents, multimedia files, and other mission-critical data. Key features: Restore files from multiple destinations With SOS Online Backup for Business, you can easily restore files from any of your systems, such as Linux, Windows and Mac. In addition, you can share files through BitTorrent, FTP, WebDAV, SFTP, Amazon S3, Google Cloud Storage, and OneDrive. Multi-platform support SOS Online Backup for Business is available for Windows, Linux and macOS operating systems, so it can be installed on any device. Backup types and file formats SOS Online Backup for Business offers local, cloud and network backups of files, including text, PDF, Microsoft Office document, HTML, image, music and video. You can also choose a file format specific to each type, such as ZIP, TAR, Tar, SVR, RAR and JAR. Advanced security SOS Online Backup for Business takes all necessary precautions to ensure your data is secure, encrypting and compressing the backups before sending them to the cloud. The encryption level, file size and file format determine the level of security. Detailed backup reports SOS Online Backup for Business can provide you with reports on every backup activity. You can also choose to archive or upload backup files to the cloud. All backup tasks and reports are sent to your email address, so you can keep track of your activities without accessing the application. Scheduler and other features You can set automated backups at fixed times to make sure your files are safe at all times. SOS Online Backup for Business can also be instructed to backup before system shutdown and when the backup volume reaches a specified size. Visit www.SOSbackup.com for more information. Apply filters to choose what to backup The backup requires a dedicated account, so you are prompted to login or create one upon launch. Aside from regular accounts, you can opt for Standard UltraSafe or UltraSafe MAX ones, depending on the desired encryption level. The more sensitive the data, the higher the protection should be. SOS Online Backup for Business can backup documents, images, music and video files, as well as user-defined formats, providing advanced filtering options. Thus, you can exclude specific folders from the analysis, limit the minimum and maximum file size, or ignore files of a specific type.
