Manage cookie settings Fifa 22 Free Download has been something of a mixed bag, but an update as free as this is well worth a download as it brings with it the rest of the patch. Below are the patch notes (full list at the bottom of the article) and screens of all things new. Greetings and welcome to FIFA 22. Please read this entire note before beginning. This is a special FIFA update as it is our first update to the Real Player Motion Data (RPM) engine in the past three years, and also includes our last major update to the game before our Olympic version (FIFA 21) in just over three months' time. We are going to share details on the new engine, but would also like to highlight what you can expect from our new game. 1. RPM: FIFA 22 is the first update of FIFA since we stopped using RealPlayer Motion Data Engine (RPM), and thus updates will be minimal this year, as we have had a lot of time to improve our engine. On that note, we could not be more excited to announce that we will be using the RPM to power future FIFA titles. This update will introduce the following changes to gameplay: * Soccer Simulation Mode - introduces and improves the Career Mode. * Skill Game Mode - supports 5v5 gameplay and two-player "Groups." * Player Control - allows you to control the ball even when on the ground. * Gameflow - allows both players to press a button to start a slow-motion replays of player actions. * RPM Debugging - allows you to fix problems related to the engine. * New Rules include: ** Supports international play over the weekend ** New tactics screens for each style of play ** Minutiae such as player crosses and set-piece routines, etc. 2. Arena - Our new Arena mode is a high-intensity competitive game mode where "control the ball" is key. Arena will run in a separate FMOD application so that it can benefit from these RPM improvements and will be scheduled in the same manner as the Career and Skill Game Modes

Features Key:

- **Live the beautiful game like never before with continued exploration of new cutting edge gameplay features**
- **The most accurate ball physics in the franchise with contextual and player-specific improvements and optimizations**
- **An attention to detail which will leave football fans breathless**
- **Create your very own club in over 250 authentic kits in-game by designing them from scratch**
- **Live more match history than any other game: create and share your own career milestones, attend the festive football tournaments, compete on your club or Personalised team as Official Rewards for top FIFA League competition**
