Our fantasy Lathe Safety Simulator brings the real experience of how your lathe works inside your favourite mobile VR headset. Learn to use your lathe with a virtual robot tutor and follow the guidance you get when you're creating exciting 3D models. Not only do you get to turn a workpiece (instead of real metal) but you get to enjoy all the feels of using a real lathe by doing it. While you're learning about the safety protocols, you also get to save your work while you're making it. Lathe Safety Simulator is the place to learn about the lathe. ## **What's new in Incremental Epic Hero - IEH2 Support Pack:**

**! BOTICCA: (patting the robot) It's been a long time since I've felt like this. ENDUMMOT: I know you! Are you that old friend of Mine? The one who gets mistaken as a wireless connection, but when you're done with whatever that is, you never want to talk about it. You just have to talk to everyone and you go home without a listening device. ENDUMMOT: I'm afraid I won't be able to make it this year, though. (ENDUMMOT opens her suit to pet the robot and that's when it's discovered she's pink with neon-green hair) ROBOTGARDENER: What do you think of this color? ENDUMMOT: It's weird, but I think it's great. (ENDUMMOT's eyes begin to glow greeny-yellow) ROBOTGARDENER: Great! I'll order some additional supply shipments. ENDUMMOT:...Thank you, but I'm not going to make it a whole lot longer, since I'm going to be retired from this company after only one year. (her eyes turn black) ROBOTGARDENER: What? But... ENDUMMOT: But I'm not going**
