Automatically remove unwanted parts of a picture This unique file manipulator can automatically remove undesired objects from images without prior knowledge of the shape of the objects, and without altering the structure of the image, in other words, without making copies of the original image. An icon stamps only the required areas as the original image is displayed, and everything else disappears. The software allows you to change the transparency of the stamped areas using a simple point-and-click procedure. The stamping process starts with a click on the object thumbnail (a rectangular area surrounding the object and displayed in green). If you click twice on the object, it is removed from the image entirely. When the stamping process is completed, you will see the original image stamped with the object removed. The software automatically removes objects from images without prior knowledge of the shape of the objects. Automatically remove unnecessary parts of a picture This unique software can remove

unnecessary parts of a picture automatically. The software automatically removes parts of a picture that are not needed by applying a stamping method to the selected object in a straightforward point-and-click interface.

**Customizable Settings:** Unwanted elements and areas in a picture are automatically removed  
Change the transparency of the unwanted elements in the preview pane  
Change the minimum and maximum area by using the Stamp Function  
Set the stamping area by clicking on the object thumbnail (inside the stamping area)  
Toggle the removal animation of the stamp  
Test the stamp  
Toggle the color of the stamp  
Toggle the preview of the stamp

**Verbosity and Animations:** The software displays an icon that stamps the regions automatically (in green). Clicking on the icon stamps only the selected areas (by default, the areas inside the stamping area). Clicking again on the icon removes the selected objects (the contents of the stamping area disappears). As you change settings, the stamp of the selected objects updates automatically. The stamping area represents the area in which the software removes unwanted parts from images

automatically. Depending on the settings chosen, you will either see the area (or the objects) that you have selected highlighted in green or, if you have selected the whole image, all areas of the image are marked in green. The stamp of selected areas (in green) appears over the image. The stamping area (the area to which the software removes unwanted parts) includes a stamp.
