System: 4.1.2, JellyBean, Nexus 4 Language: English Size: 146.1 MB Hi guys, here is a new updated version of my game "Slime Shooter". In this game I try to give an idea to the shooter genre in a different way. First, you start the game in a random place with your cannon as only weapon. The enemies are mushroses - with hampers weapons and you have to destroy them as fast as possible in your own area or they will destroy the area where you were. The game is a top-down shooter, which means that the enemies will continue to come in a line from right to left. Hire upgrads for your cannon and find the best way to live. Your goal is to reach the number of points, which is the highest of the game. Your points will be rewarded in the form of unlockables, like new enemies, new weapons or new bonuses. If you like this game, rate it to make it grow bigger and better! Gamescom 2.0 Game Engine: SlimEngine-1.5.4 Category: Shooting Device: Android System: 4.1.2, Jelly c9d1549cdd
