A long-ago Springsteen fan, I had such extreme positive memories of him that it was easy to overlook the fact that I didn't want the same stuff that he did. I liked music that showed some range. When he hit his stride on the late-70s releases, he seemed to go further and further away from the pastoral drama of his early stuff. And by the time he ended with Stormy Weather, he was making music that was trite and clichéd. Lots of rage, lots of longing. The magic of the early records was gone. It wasn't until the Great Recordings in the early 80s that I revisited his best albums. From that point on, he was one of my most treasured musical figures. I knew I wanted to see his famous Broadway show, Jersey Boys. But I hated that he was playing at the same time, in the same place as, the now-legendary Def Leppard. What a hardship. I

Drug Release from a Thick Hydrophilic Carbomer Hydrogel. Biodegradable materials that rapidly release therapeutic agents have great potential for treating wounds and controlling biological processes in vivo. In this study, we provide a detailed characterization of the drug-releasing kinetics and underlying release mechanisms for model-preparation-dependent drug release from a thick hydrogel. Drug release is measured as a function of time at physiological pH and ionic strength (IS) by a novel, high-throughput microfluidic assay. The kinetics of drug release is found to be dependent on the preparation method. Films prepared by spin coating or solvent casting to produce thinner gels have a distinct biphasic behavior, with initial fast release followed by a more gradual drug release. Thicker gels prepared by a solvent-free method with standard thickness of 5 mm or thicker exhibit a very slow release with a log
