The form needs a five digit code to verify the object to see if it's the right one. So when the user is filling the form, a message box pops up asking for the code. I want to display the code in a text box, or an editable text box but for some reason, the text box value that gets populated by the user input from the message box is empty. The code looks something like this:

```
' edit order object, code for verification cnnSelectedOrder = Form1.SelectedOrder objSaveOrder = Order.GetSaveOrder(cnnSelectedOrder) objOrder = Order.GetOrder(cnnSelectedOrder) strCode = InputBox("Are you sure you want to overwrite this order? This will erase everything of this order. Otherwise you can edit what you want.") If strCode = "" Then exit sub End If objOrder.Code = strCode objSaveOrder.Save A: If the user presses Cancel, the control will get this value set. That's why you get an empty string. Try this instead: If strCode = "" Then Exit Sub End If strCode = InputBox("Are you sure you want to overwrite this order? This will erase everything of this order. Otherwise you can edit what you want.") If strCode "" Then Dim objSaveOrder As Order = Order.GetSaveOrder(cnnSelectedOrder) objSaveOrder.Code = strCode objSaveOrder.Save End If
```
