Q: Why is the equation $\overline{\Gamma}_{\mu\nu} = \frac{1}{2} \sqrt{-g} g_{\mu\nu}$? Why is the equation $\overline{\Gamma}_{\mu\nu} = \frac{1}{2} \sqrt{-g} g_{\mu\nu}$? I know I must use the Christoffel connections for the greek indices in the derivative terms but why should there be the bar in the first equation and why is the symbol for the connection a delta? A: If we're going to use the Christoffel connection, we need to make the metric Lorentzian in the first place, by taking the determinant of the metric tensor g , or equivalently, taking the determinant of $g^{\mu\nu}$. Thus, we need the relation that $\overline{\Gamma}^{\mu\nu\rho} = \frac{1}{2} \sqrt{-g} g^{\mu\nu} g^{\rho\sigma}$ (which is derived in the comments, but can also be seen more generally as the definition of the Levi-Civita tensor for the metric g). Note how this convention for the metric is more covariant - it depends on the volume element of the space, which is why the 'bar' is used. As to the $(0,i,j)$ part, the first two terms are just the Levi-Civita connection coefficients of the Euclidean metric g_{ij} . The last term is the trace of the tensor, which is the same as the traceless part of the Levi-Civita connection, and therefore the Christoffel connection.

Q: Why doesn't my new user tab in nautilus show? I installed Ubuntu 16.04 with Unity, then installed Gnome shell and a few Gnome apps. The problem is that my Ubuntu 15.10 nautilus doesn't have a "new user" tab - but the new user tab still shows up in
