bmimobile.. I think youâ .Q: If g is a pythagorean triplet, show that g has two even coordinates Let

(a, b, c) be a Pythagorean triple. If g is a pythagorean triple such that $\{g, a, b, c\} = \{2k_1, 2k_2, 2k_3, 2k_4\}$ and $k_1 + k_2 + k_3 + k_4 = \text{odd}$, prove that there exist $l, m \in \{2, 3, 4\}$ such that $g = l$, $a = 2k_l$, $b = 2k_m$, and $c = 2k_l + 2k_m$. First of all, we know that $\{a, b, c\}$ has even elements. We also know that $\{g, a, b, c\} = \{2k_1, 2k_2, 2k_3, 2k_4\}$ as well. From the first equation, we can say that $g = 2k_l$ for some $l \in \{2, 3, 4\}$. From the second equation, we can say that $a = 2k_l$ for some $l \in \{2, 3, 4\}$. From the third equation, we can say that $b = 2k_m$ for some $m \in \{2, 3, 4\}$.

Hence, we have $g = 2k_l$, $a = 2k_l$, $b = 2k_m$, and $c = 2k_l + 2k_m$. Is this proof correct? A: It looks a bit messy, but here's an approach in the style of the induction-style proofs. The first line reads like a proof by contradiction - if g is not one of the numbers a, b, c , then it has an even sum with one of these three. This is not a contradiction

476 P.2d 831 (1970) 82 N.M. 598 KANGAROO MOTORS, INC., Plaintiff-Appellee, v. FORD MOTOR COMPANY, a Delaware corporation, Defendant-Appellant. No. 653. Court of Appeals of New Mexico. December 6, 1970. Certiorari denied February 10, 1971. *832 Leonard B. Whitney, McGinnis, Lochridge & Kilgore, Austin, Tex., for appellant. Pete Clark, Clark & Stockard, P.A., Roswell, for appellee.

OPINION HENDLEY, Judge. This is an appeal from a judgment in the sum of \$9,000.00, the jury having awarded Kangaroo Motors, Inc., a New Mexico corporation, the difference in the sale price of an automobile purchased from Ford Motor Company and the price Kangaroo Motors was permitted to pay Kangaroo Motors for the automobile. In this court Kangaroo Motors seeks a reversal of the trial court's action setting aside a \$9,000.00 jury verdict in its favor, the only issue being whether a new trial should be granted for certain alleged errors at the trial level, which would entitle it to an increased judgment of more than \$9,000.00. Kangaroo Motors also seeks a reversal of the trial court's judgment of \$9,000.00. We affirm. Kangaroo Motors, in July of

1967, contacted Ford Motors with reference to the purchase of two pickup trucks. On July 30, 1967, Ford Motors, through Jerry Weiler, the district sales manager at Detroit, contacted Peter Cooke, the manager of Kangaroo Motors in New Mexico, with reference to the sale of two pickup trucks. On August 2, 1967, a price of \$11,252.00 was discussed. Cooke informed Weiler that Kangaroo Motors could pay \$10,504.00. The next day the sales manager of Ford Motors in New Mexico contacted Cooke and a sale price of \$12,000.00

Angeles International Airport this week finished work
on a multimillion-dollar project that will move and
reconfigure the airport's longest and busiest

passenger terminal. Terminal 3 is now open to the public. The project spanned nearly two years and was completed at a cost of \$32 million, said airport spokesman Josh Wolf. It originally was scheduled for opening in the fall of 2008. The \$80-million "reimagining" of Terminal 3 took place during the summer and fall of 2008 to increase the capacity of the airport and expand business and international services.
