TARKWYN ROGA - Editor-in-Chief "With a fascinating story and a mix of gameplay that gives me the feeling that I'm playing the Elder Scrolls, the game is a must-have for RPG fans." The game has some nice visual polish and the dialogue is well written, but aside from that it doesn't really break any new grounds in terms of gameplay, and instead is very much what one would expect. It may not be revolutionary, but it is certainly the best RPG you can play on the PS3. PIGUPPA - Reviewer "The graphics, the sound effects and the music are really nice. It's a very good game and it's fun to play." If you played an RPG before but have been away from them for a while, Elden Ring is a great way to rekindle your love for the genre, and for those who don't know what all the fuss is about, this is a great entry-level RPG to get into. If you enjoy the genre, it will be a very rewarding experience. Rolls-Royce S-Class (1930) The S-Class was a streamlined two-seat version of the S4 and S5. The S-Class was one of the company's last airliners. Only one was built and it was used as a passenger transport, transporting Maharajah of Kochi and his entourage from London to Cherrapunji. The S-Class first flew in 1929 and was followed by the S2-Class, S3-Class and S5-Class in 1930. The last S-Class, S-112, first flew in 1932. Design and development The S4 and S5 were developed with streamlined bodywork and were effectively supercharged variants of the S3. The S-class had a better fuel efficiency than the S3-class and was considered a departure from the all-metal, fin-based airliners of the 1920s to a new design philosophy that emphasised low drag form. The S-class had a weight reduction of over over the S3, achieved by using a honeycomb-shaped steel skin that occupied over half the aircraft's area, a single moving tail-skid to aid stability on landing, and a belly fairing on the fin. The S-class was similar in layout to the S3, but with a more streamline-shaped nose. The S3 was an all-metal aircraft with more cantilever wings, while the S-class had a steel outer skin with a wood-skinned centre section. A number of different engines were tested on the S-class and S3-class, including the Wright J-5, Nieuport 7N and several versions of the Wright Whirlwind. A variant with four-bladed propellers was also tested, but the old four-bladed props caused aerodynamic problems. Operational history Maharajah of Kochi and his entourage flew in the S-class to Cherrapunji to collect him from the airport at Cherrapunji. S-112 was used by Lufthansa as a ferry after the outbreak of World War II and to fly between Munich and Berlin. Maharajah of Kochi owned a single S-class, which he flew on a number of occasions. Of the S-class and S3-class, three S-class were still in service in 1934 and two of the S-class remained in
