You can define the

After you select the one you need, you can choose the color you want to use and click "OK". The extension looks pretty simple when working. However, it has a lot of settings, such as ones related to username/password suggestions (manage them with the "Settings"

---

menu item), the search results filter (listen to its options with the "Filter" menu item), the number of logins to be saved (click the "Settings" menu item), how to sort the list of logins (from the "Settings" menu item), and the way logins will be added (as mentioned, with "Add" from the "Settings" menu).
